

CP METERING DRUM

PROVIDES A CONSTANT, EVEN MATERIAL FEED RATE INTO YOUR SYSTEM

OPTIMIZE SEPARATION EFFICIENCY TO INCREASE THROUGHPUT.

Whether you utilize automated or manual sorting, the CP Metering Drum provides the most efficient presentation of in-feed material. Whatever the size of your MRF, you will benefit from increased system capacity, decreased downtime and an immediate return on your investment.

A PERFECT FIT FOR YOUR OPERATION.

The new CP Metering Drum is an easy retrofit. Add it to your existing facilities and be sure of seamless integration, prompt delivery, fast installation and rapid response to any questions or concerns.

CP MANUFACTURING: THE WORLD'S LEADER IN SEPARATION TECHNOLOGY.

All CP equipment is designed, built and field-proven 100% in our own plants. From start to finish, from conception to completion, no company does more to provide cutting-edge solutions for MRFs. Whether you process 100 tons a day or 1,000, you can profit from the innovation, experience and dependability of CP Manufacturing.

MATERIAL RECOVERY FACILITIES

CP METERING DRUM

INCREASE SYSTEM EFFICIENCY WITH THE BEST METERING DRUM IN THE INDUSTRY.

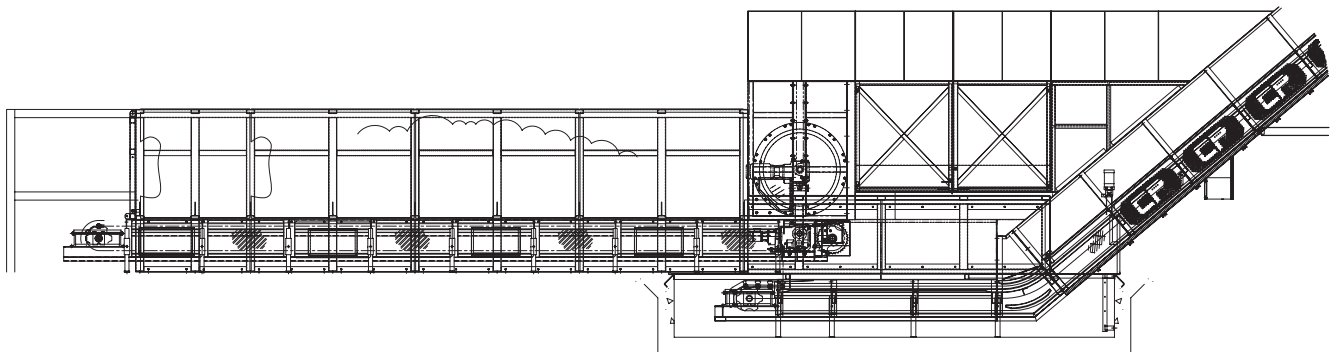

Featuring a heavy-duty rotating drum that prevents surges and provides a consistent material feed rate, the CP Metering Drum cost-effectively layers light and heavy materials at the outset. The result: optimum efficiency and increased throughput, system-wide.

BENEFITS

- :: Provides a consistent material feed rate into the system
- :: Increases throughput
- :: Prevents surges
- :: Cost-effectively optimizes system separation efficiency
- :: Maximizes screen efficiency
- :: Allows for more efficient manual sorting
- :: Increases system capacity
- :: Decreases downtime caused by over-feed surges
- :: Heavy-duty construction
- :: Multiple throughput capacities available
- :: Designed and engineered for fast, easy retrofit
- :: Auto-sensing hydraulic lifting system

Heavy-duty rotating drum
