

Scalping Screen

DESCRIPTION

CP's Scalping Screen, typically positioned just prior to the CP Disc Screen, removes small fiber, containers and fines to enhance the recovery of valuable recyclables. While the smaller fiber and containers fall through the discs, the larger pieces continue on to the CP Disc Screen for the final cut. Depending on your volume, the Scalping Screen can have 1, 2 or 3 decks for maximum separation.

BENEFITS

- ❖ Automatically separates small fiber, containers and fines
- ❖ Cleaner and more marketable end products
- ❖ Increases system processing capacity

FEATURES

- ❖ Multi deck design allows for graduated disc spacing
- ❖ Serrated elliptical discs made of 1/2" thick steel plates
- ❖ Easy access to each rotor
- ❖ Waterfall design, along with clogged, elliptical discs ensure optimum agitation of material
- ❖
